Webdesign 2

Turning designs into a working website

1.3

Webdesign 2

delivery method: Github

language: HTML, CSS, JS

You should always inform the visitors of your repository about its purpose and contents. Installation and usage instructions will help the users and encourage the contributors.

Based on the templates below, integrate both the desktop and the mobile views with HTML 5, CSS 3 and Javascript, SEO-optimized and in exact applyance with the **W3C standard**.

The images and text may differ but the look-and-feel and the design must be identical between your page and the visual below. The fonts must be strictly similar to the ones from the template (**Avenir fonts, Roboto font**).

Find a way to import them!

The menu and filters must be strictly identical to the templates ones.

All the links must be clickable and operational!

Feel free to use as much CSS tools as you need.
You should use grids to create your interface.
